### A Platform of Exchange for Young CJK Local Public Officials Hosted by Korea Ministry of Foreign Affairs

The Korea – Japan – China Trilateral Cooperation Workshop for Public Officials began in 2012, and has since been hosted every year by the Korea Ministry of Foreign Affairs. The workshop has the following three objectives: (1) to increase understanding on CJK trilateral cooperation (2) to exchange opinions at the local government-level on the measures to develop cooperation among the three countries (3) to build a network among the three countries’ public officials. The main participants are the Korean local public officials engaged in matters related to international cooperation and the Chinese and Japanese public officials that are working or are receiving training in Korea. Most of the Chinese and Japanese public officials working in Korea are young public officials dispatched from regions that have sister/friendship relation with Korea counterparts. The workshop continues to contribute to the long-term development of network and local exchange.

The most recent workshop was held in Gyeongju in May 2019, where a total of 88 CJK local public officials participated (35 from China, 15 from Japan, and 38 from Korea). During the two-day workshop, the public officials participated in various programs, including a lecture from the then Deputy Secretary-General of the TCS YAMAMOTO Yasushi, titled “The Current Status of CJK Cooperation and the TCS”, and another lecture from the former Korea Ambassador for Northeast Asia Cooperation Dr. CHUNG Sang Ki, titled “Differences in the Cultures of CJK”. Participants also listened to presentations on cases of CJK cooperation by CJK public officials, watched culture performances, and attended a culture experience program.
